- HTML/CSS
- InVision

### PROFILE

I'm a creative problem solver focusing on user-centered application design. My design process is research driven and user validated. I'm fascinated by understanding the user perspective and coming up with innovative solutions that create a seamless user experience. I am seeking a UX design role where I can combine my research, problem solving, and interface design skills to create world-class digital product experiences.

### EXPERIENCE

#### UX/UI Design Engineer

Danfoss  
Plymouth, MN | March 2022 - Present

- Design and develop touchscreen display applications for off-highway vehicles and industrial equipment.
- Work with customers and software engineers to define and interpret project design specifications and identify user needs.
- Create flow diagrams, storyboards, wireframes, mid/high fidelity prototypes and usability testing.
- Demonstrate strong visual design skills and attention to detail in order to deliver pixel-perfect user interfaces.

#### Administrative Assistant

Osseo Area Schools  
Osseo, MN | September 2019 - March 2022

- Researched, designed and implemented a redesign of the organization's website for desktop and mobile.
- Wrote, edited and created electronic monthly newsletters for up to 4,000 subscribers.
- Assisted in project management functions including planning, budgeting and reporting.

#### Graphic Designer

January 2018 - Present

- Designed and sold over 5,000 pieces of stationery and materials.
- Worked directly with customers to create custom designs that meet their specifications.
